Roxanne confirmed what I had sent you. She has programmed an additional \$21 million for FY27, FY28 and future years for 3-4 more wells and believes that's enough to fully transition away from irrigating the 200 acres and accommodate projected growth in flows.

I'm also saddened, **a bit disgusted**, extremely frustrated and disheartened... but that is nothing compared to how Shannon is feeling. And no, I won't miss the battle. This one or the inevitable others.

Subject: A few things

Hi Karen,
A few comments/questions:

1. How is Lauren?
2. Any further confirmation on injection well costs for the Dells?
3. I'm really saddened about SPTP. The **sheer ignorance** of the program details is just pouring in thru social media. It is going to be an **epic challenge** to educate the electorate. It's also clear from the RRN today that Dr. Noonan is really pushing CP2.0 or maybe he's using that conveniently to hide his actual NIMBY views on the program. Very frustrating. I'm sure you won't miss this battle.

Brian
